**Prof.E.M.Reddy**

## **Abstract**

Our project's main objective is to help the people in village areas where no advanced technology is developed, the peoples in that area not get information easily accessible, so we want to help them by making a website on which we will give information about hospitals and medical organizations in their area. Our project is mainly based on Islampur village in Sangli district. We have developed a practice model for that area. We got contact numbers of local doctors and hospitals and some volunteers who will help the people in this hard time. At starting we have carried out a survey through google forms to know people's problems and to analyze it. We successfully analyzed the data that we got from various responses from peoples. We have developed a platform on WhatsApp from where people get contact to us and we will help them in their problem. On our website we also added importance of vaccination, steps to register for vaccination and also added videos of it. Also we added about plasma donation, importance of it, steps to follow, some links to register and some guidance videos to help the needy peoples. We have also added a success stories of how some villages done the fight against Corona Virus and how they win, to motivate the authorities of the village and to do some kind of help to their village. And we also want to develop it further with

more updated information on daily basis and also we want to give this website to Islampur village for their use.

## **ACKNOWLEDGEMENT**

Words fall short to express our deep sense of gratitude towards all who have given their valuable time, energy and suggestions towards our project entitled ,  
“UNITE AGAINST COVID-19.”

It gives us great pleasure in presenting this report. We want to express our special gratitude towards our PBL Professor Dr. Avinash Deshmukh Sir without their help our project couldn't have reached the final ending.

We also want to thank a group of people from whom we got information regarding the availability of medical help so that we can provide them with the required help.

# CHAPTER 1

# **INTRODUCTION**

A. Coronavirus disease 2019 (COVID-19) is an infectious disease caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). It was first identified in December 2019 in Wuhan, China, and has resulted in an ongoing pandemic. The first case may be traced back to 17 November 2019. As of 8 June 2020, more than 6.98 million cases have been reported across 188 countries and territories, resulting in more than 401,000 deaths. More than 3.13 million people have recovered.

B. The virus is primarily spread between people during close contact, most often via small droplets produced by coughing, sneezing, and talking. The droplets usually fall to the ground or onto surfaces rather than travelling through air over long distances. Less commonly, people may become infected by touching a contaminated surface and then touching their face. It is most contagious during the first three days after the onset of symptoms, although spread is possible before symptoms appear, and from people who do not show symptom

C. The virus is primarily spread between people during close contact, most often via small droplets produced by coughing, sneezing, and talking. The droplets usually fall to the ground or onto surfaces rather than travelling through air over long distances. Less commonly, people may become infected by touching a contaminated surface and then touching their face. It is most contagious during the first three days after the onset of symptoms, although spread is possible before symptoms appear, and from people who do not show symptoms.

## **PANDEMIC**

The COVID-19 pandemic, also known as the coronavirus pandemic, is an ongoing pandemic of coronavirus disease 2019

(COVID-19), caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The outbreak was first identified in Wuhan, China, in December 2019. The World Health Organization declared the outbreak a Public Health Emergency of International Concern on 30 January, and a pandemic on 11 March.

A global coordinated effort is needed to stop the further spread of the virus. A pandemic is defined as “occurring over a wide geographic area and affecting an exceptionally high proportion of the population.” The last pandemic reported in the world was the H1N1 flu pandemic in 2009.

Coronaviruses are important human and animal pathogens. At the end of 2019, a novel coronavirus was identified as the cause of a cluster of pneumonia cases in Wuhan, a city in the Hubei Province of China. It rapidly spread, resulting in an epidemic throughout China, followed by an increasing number of cases in other countries throughout the world. On 30th January 2020 India recorded its first COVID-19 case in Kerala State. It was a student who had travelled to China. And till the start of June India has over 200 thousand confirmed cases.

In this project we developed a website for the people who are living in rural areas to help them by letting them know about the beds, oxygen cylinders and other medical availability in their nearby hospitals and providing them the required help.

And we mainly focused on Islampur and Sangli district.

# CHAPTER 2

## **GOOGLE FORM SURVEY**

We have carried out a survey through Google Form to know the difficulties that people facing during this major pandemic. So that, we can find out solution for their problems.

Covid Impact Survey project developed a survey for a project that includes three core modules Focused on

- 1) Physical Health
- 2) Social and mental health
- 3) Economic and Financial health

**1) Physical Health:** The physical health modules asks respondents questions about symptoms related to covid 19. relevant existing conditions and health insurance coverage.

**2) Social and mental health:** The module includes questions for survey respondents that generally align with the current population survey, focused on communication with friends and family, naivety, and volunteerism.

**3) Economic and financial Health:** This module prioritizes questions for respondents on Employment. Food security and government cash assistance.

## **WHATSAPP**

- There is a section on our website 'WhatsApp' through which a user directly goes in WhatsApp and then they can contact us, we have given our contact numbers there.
- And there is also one WhatsApp group link through which a user can join that group for the help they want.
- They can post what is the requirement for their problem and anyone in the group will help them on urgent basis, they will provide contact numbers of nearby hospitals and covid care centers.

### **Report: WhatsApp has seen a 40% increase in usage due to COVID-19 pandemic**

- Social media usage has grown as a result of the COVID-19 crisis, as more users go online to stay connected with family, friends and colleagues. Now, new data from insights and consulting firm [Kantar](#) reveals exactly how much some apps are benefiting. According to a survey of more than 25,000 consumers in 30 markets conducted from March 14 to 24, WhatsApp is the social media app that has experienced the greatest gains due to COVID-19.

- Overall, Facebook-owned WhatsApp has seen a 40% increase in usage that grew from an initial 27% bump in the earlier days of the pandemic to 41% in the mid-phase. For countries already in the later phase of the pandemic, WhatsApp usage has jumped by 51%.
- In individual markets, that usage may be even higher, Kantar noted. For example, WhatsApp usage in Spain was up 76%.
- Across all messaging platforms, the growth in usage has been the largest in the 18 to 34-year-old age group, the study also found. In addition, WhatsApp, Facebook and Instagram saw a 40%+ increase in usage from this same demographic.
- So that's the reason we are focusing on Whatsapp, so we can connect the people of the area that we are targeting. We are trying to connect and gather some youngsters through our Whatsapp group and help needy people.

## **IMPORTANT CONTACTS**

- Want Remediesivir? Contact the concerned officials in Maharashtra, you can get it here ... \*  
In case of non-availability of Remediesivir Injection due to ongoing shortage of Remediesivir Injection in the State, please contact your District Drug Inspector and Assistant Commissioner below.
- नाशिक \* Nashik: \* S. S. Deshmukh, Drug Inspector, 9850177853
- Madhuri Pawar, Assistant Commissioner, 9869114998
- Dhule: \* S. N. Saale, drug inspector, 8983290162
- M. V. Deshpande, Assistant Commissioner, 8412803507
- \* Nandurbar: \* R. M. Idlavar, Drug Inspector, 9619207976
- V. T. Jadhav, Assistant Commissioner, 8180020514
- \* Jalgaon: \* A. A. Raskar, Drug Inspector, 8605347220
- A. M. Manikrao, Assistant Commissioner, 9373556025
- \* Aurangabad: \* R. M. Bajaj, Drug Inspector, 9422496941
- MK Khaleshwarkar, Assistant Commissioner, 9423738922

## **INPUT FOR WEBSITE**

## **Website**

We have developed a website on which we are uploading the required Information about Covid19, its precautions, about availability of Beds, plazma donation, medical facilities, Hospital details, awareness about Vaccination,etc .

- Vaccination -

Vaccination will be an important tool help to stop this major pandemic. It is a safer way to build protection. So people can Register their Vaccination Slot through it.

- Contact -

In this we have added one simple form through which people can ask their problem (Quires) so that we solve their problems through it.

- WhatsApp -

We have add one WhatsApp icon through people can land on WhatsApp. So they can contact through that platform also. There they will be get Information fastly.

covid 19 (17) WhatsApp

File | H:\web%20development\html-project\vaccination.html

vaccinated for COVID-19, you may be able to start doing some things that you stopped doing because of the pandemic. For example, you can gather indoors without masks with other people who are fully vaccinated. We are still learning how vaccines will affect the spread of COVID-19. Until we know more about how vaccines will affect the spread of COVID-19, people who are fully vaccinated against COVID-19 should keep taking precautions in public places like wearing a mask, staying 6 feet apart from others, avoiding crowds and poorly ventilated spaces, and washing your hands often. People are not considered fully vaccinated until two weeks after their second dose of the Pfizer-BioNTech or Moderna COVID-19 vaccine, or two weeks after a single-dose Johnson & Johnson's Janssen COVID-19 vaccine. You should keep using all the tools available to protect yourself and others until you are fully vaccinated.

**COVID-19 vaccination is a safer way to help build protection**

COVID-19 can have serious, life-threatening complications, and there is no way to know how COVID-19 will affect you. And if you get sick, you could spread the disease to friends, family, and others around you. Clinical trials for all vaccines must first show they are safe and effective before any vaccine can be authorized or approved for use, including COVID-19 vaccines. The known and potential benefits of a

## **CONCLUSION**

From this project we learnt how to do team work, how to build good coordination when you are working in a group and how to reach your dream project effectively. And also learnt how to use other's opinions in your project and make it look creative, interesting. And how to do a group project with the help of teammates, how to distribute work accordingly, I am sure this will help all the peoples in future in their life to do a team work.

From this we also learnt how to use programming languages in development of website, and we learnt them in a short period effectively and they will be helpful to us in our future. We also learn how to use GitHub for building the project and how to upload the codes there. We also learnt how to host a website and what is the procedure for it.

And we also learnt how to create google forms for the survey in the peoples and how to analyze the data properly that we got from our surveys.

This project helped us a lot to gain knowledge.
